Reconciliation: the per-currency out-of-pocket figures above are the net asset positions reported on the AGL16 ledger control account (Brazilian Reis –1,412.77 · Singaporean SGD –45 · USD –1,575.83) and the *Liabilities* column (sourcing commission and materials, 329.74 USD). The schedule overleaf lists every transaction in the AGL16 *Transactions* tab (69 entries) so that each figure can be traced to source.

SUPPORTING SCHEDULE — EVERY AGL16 TRANSACTION

Every monetary line is stated in USD in the *Amount (USD)* column, converted at the rates on page 1 (BRL 0.20216167, SGD 0.79246597). The *Original* column is the figure as recorded in the ledger, for traceability only. All 69 transactions in the ledger, in ledger order. **Signed amounts as recorded:** outflows are negative, inflows positive. Some costs were funded by currency conversions, so individual lines are not simply added together — the chargeable amount is the net position per currency shown in the summary on page 1. The *Treatment* column states how each line bears on this invoice.
